DETAILED ACTION

- 1. Claims 1-17, 21 and 22 are pending in the present application.
- 2. Claims 18-20 have been cancelled. Claim 1 has been amended; and new claims 21 and 22 has been added.

Drawings

3. The drawings were received on August 31, 2001. These drawings are acceptable.

Specification

4. Applicant is requested to update reference to related US Patent Applications in the disclosure by including the proper application serial number or patent number on page 1, 34 and 37.

Claim Objections

Claim 1 is objected to because of the following informalities: "A" should read "a".
 Note claim 1 line 3. Appropriate correction is required.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2167

7. Claims 1-17, 21 and 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the following limitation is vague: "configured to access hardware and/or software entities" [note: claim 1 lines 3-4]. The term "and/or" is vague.

Regarding claim 17, the following limitation is vague: "or" [note: claim 17 line 4].

Dependent claims 2-16, 21 and 22 are rejected based on dependency.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Coleman et al. US Patent 5,889,990.

Regarding claim 1, **Coleman et al.** teaches a module management system for obtaining management information from a computing environment [note: Figure 4, element 31], the system comprising:

A library of data miner modules each configured to access hardware and/or software entities in computing environment for management information [note: Figure 5, elements 50 through 53];

Art Unit: 2167

a library of module registration files each defining an implementation of a data miner module [note: Figure 7, dynamic registration 108; column 11 lines 46-51]; and a module manager that provides access to each of said data miner modules stored in said library of data miner modules for which said library of registration files includes a corresponding registration file defining an implementation of said data miner module [note: column 11 lines 52-58].

Allowable Subject Matter

- 10. Claims 2-16, 21 and 22 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
- 11. Claim 11 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
